BEFORE.

AFTER.

Dentistry. Simplified.
DISCOVER THE DRYSHIELD DIFFERENCE

Practice dentistry like never before.

High suction. Saliva ejectors. Bite blocks. Dry angles. Cotton rolls. Gauzes… You can replace them all with one simple, powerful isolation solution. DryShield helps to keep your work environment dry, clean and visible. By removing the normal barriers to getting your work done without a flurry of motion from your dental assistant, you’ll be able to work more efficiently. You’ll enjoy a more productive office environment and have even more satisfied patients. DryShield will also pay for itself patient after patient by reducing your procedure times.

ONE SIMPLE DEVICE THAT DOES IT ALL

DryShield performs all of the tasks of a high-suction evacuator, bite block, tongue guard and oral pathway protector in one easy-to-use device. It’s an intelligent breakthrough in isolation, bringing unmatched levels of ease and comfort to doctors and patients alike.

1 Suction
Removes water, saliva and debris from patient’s mouth to keep your work area dry

2 Interchangeable Bite Block
Available in multiple sizes to facilitate access and maximize patient comfort for all mouth sizes

3 Tongue and Oral Pathway Shield
Keeps patient’s tongue shielded and oral pathway protected from trauma

4 Airway Protection
Protects airway from particles and debris

5 Cheek Retractor
Keeps patient’s cheek retracted to improve visibility and protect it from trauma

Easy-to-Insert Design
Mouthpiece can be inserted in a few seconds, and removed even faster

AutoClavable
DryShield is engineered to be fully autoclavable.
SO MUCH TO LOVE, SO EASY TO USE

What Sets DryShield Apart?

DryShield was designed by a practicing dentist who understands the challenges patients and dentists face. This real-world understanding of dentistry has led to a product that provides superior isolation of the oral cavity for professionals and unmatched comfort for patients.

• DryShield has been engineered to be fully autoclavable
• The DryShield mouthpiece is constructed from silicone material to provide a soft, smooth and flexible mouthpiece that contours comfortably to a patient’s mouth
• DryShield is amazingly easy to install in only a few simple steps—no special equipment needed
• DryShield has been designed to achieve unmatched suction
• The DryShield mouthpiece comes with multiple holes and passageways designed to direct air and water flow efficiently
• DryShield is effortlessly portable for operatories and offices

SEAMLESS, COST-EFFECTIVE INTEGRATION
