Class B, simply profitable
The essentials of sterilization

Simple and expandable. Lina is one of the range of W&H sterilizers which offers maximum safety and an excellent price-performance ratio with its Class B cycles and a built-in USB data log.

Class B cycles exclusively
The Lina sterilizer works exclusively with Class B cycles and with short ECO B cycles for smaller loads.

Simple navigation
All sterilization options are easily accessible with the easily operated keypad.

ECO B sterilization program
The cycle time can be reduced by half for small loads.

Built-in data log
The built-in data log means that sterilization cycles can be saved to a USB stick without needing cables and external boxes.

Barcode label printer
The LisaSafe label printer can be connected to the sterilizer to print barcodes. Combined with the built-in data log your traceability system is enhanced.

#### Your advantages at a glance

- The ECO B cycle reduces the cycle time by half
- Low-noise operation with the patented water separation system
- User-friendly keypad for simple navigation to all sterilization options
- Built-in dust filter to protect internal components
- Programmable cycle start
- Excellent value for money
- Integrated automatic water filling valve (optional)
- Automatic digital cycle recording on USB stick (optional)
